

Anthony Schurle

281-229-9953 | as556@rice.edu | linkedin.com/in/anthony-schurle | github.com/anthony-schurle

EDUCATION

Rice University

Bachelor of Science in Computer Science

Houston, TX

August 2024 – May 2028

- GPA: 3.7
- Trustee Distinguished Academic Scholarship

PROJECTS

Personal Portfolio | *Python, TypeScript, SASS, HTML5, PostgreSQL*

June 2025 – Present

- Hosted at www.anthonyschurle.com
- Configured **Nginx** as a reverse proxy with HTTPS (**Certbot**) and managed DNS through **Cloudflare**
- Designed normalized **PostgreSQL** schemas for contact forms with **SQLAlchemy** + **Pydantic** validation

SignalSiege (Go-Inspired Game) | *Python, TypeScript, SASS, HTML5, PostgreSQL*

May 2025 – Present

- Engineered a turn-based AI system with difficulty scaling, leveraging game-state deep copies, BFS traversal, and statistical heuristics to simulate optimal router placements; AI moves computed under 100ms on a 10x10 grid and defeated beginner-level bots on Online-Go.com in 95% of 20 test games
- Implemented router placement rules via **graph connectivity algorithms**
- Built full serialization and deserialization of the game board, enabling AI self-play and persistent saves
- Implemented secure login and registration endpoints using **JWTs** stored in **HTTPOnly cookies** for client-side session persistence

r2a (Disassembler) | *Python, RISC-V, Bash*

August 2025 – Present

- Python RISC-V modular library disassembler that converts raw binaries into assembly, supporting multiple instruction formats and extensions
- Automated testing framework using Bash to verify binary equivalence between original and reassembled code, ensuring lossless disassembly

Self-Hosted Infrastructure | *Linux*

May 2025 – Present

- Deployed and maintained over 10 self-hosted services using **Docker Compose**, including Immich, Jellyfin, CalibreWeb, Wiki.js, and Vaultwarden with data redundancy
- Secured external access to internal services using Nginx, Let's Encrypt, and Cloudflare DNS

EXPERIENCE

COMP 140 TA

August 2025 – Present

Rice University Computer Science Department

Houston, TX

- Leading lab sessions for 20+ students, reinforcing programming fundamentals and guiding successful completion of coursework

Pool Lifeguard

May 2024 – August 2024

Greater Houston Pool Management

Houston, TX

- Recognized as Lifeguard of the Month for vigilance and teamwork, ensuring safety of 100+ daily patrons

TECHNICAL SKILLS

Languages: Python, SQL (PostgreSQL), TypeScript (JavaScript), HTML5, CSS, R, SASS, RISC-V

Frameworks & Libraries: FastAPI, Gunicorn, Uvicorn, SQLAlchemy, pandas, numpy

Developer Tools: Git, Docker, Docker Compose, VS Code, GitHub, KiCAD

DevOps & Deployment: Nginx, Certbot (Let's Encrypt), Cloudflare DNS, Linux Shell, VPS
